

App Launch (on AppDelegate in applicationDidBecomeActive:)

// If user returned to app from background, make sure to show SPVideoReel if user returned within 5 minutes, otherwise, drop SPVideoReel and return to BrowseVC.

```
[[videoReel delegate] userDidCloseChannel:videoReel];
```

// If user returned to app from background after 1 minute, make sure to reset/rebuild DataUtilities

NSMutableDictionary, as all active CoreDataUtilities would have been dropped from memory, and our set would not be updated reflecting this change.

```
[self setDataUtilities:nil];
```

// Ping API for Channels: (rolls/featured?segment=ipad_standard route)

```
[ShelbyAPIClient getAllChannels];
```

// Make this app can playback audio in background mode and while in Silent or Vibrate mode

```
[[AVAudioSession sharedInstance] setCategory:AVAudioSessionCategoryPlayback error:nil];
```

```
[[AVAudioSession sharedInstance] setActive:YES error:nil];
```

// Make sure device screen doesn't dim or go black when user hasn't interacted with app for a few minutes

```
[[UIApplication sharedApplication] setIdleTimerDisabled:YES];
```

// If user is logged in, make sure to get Stream, Likes, and Personal Roll.

```
[self pingAllRoutes];
```
